Wine Program

Now the leader in Charlottetown's dinner hour restaurant scene, Sims Corner Steakhouse offers the best selection of New-World and Old-World wines and was the first restaurant in Charlottetown to receive the Wine Spectator Award of Excellence.

Our wine cellar is located on the lower level of our restaurant, adjacent to our 24-person private dining room. It is enclosed in original brick and stone, and features three large windows looking in. Our cellar is controlled digitally, both for temperature (ranging from 14-15 degrees Celsius) and humidity (between 45-55%). Our white wines are stored in our walk-in cooler. Our by the glass red wines are stored in a service fridge and are maintained at 16 degrees Celsius. In addition, we have an 8-unit Enomatic wine dispensing machine. Our Enomatic machine has allowed us to diversify our by the glass program and introduce some higher end wines while maintaining the integrity of the wine.

Sims cellar features wine from 10 different countries, with over 150 labels represented. There is a deliberate focus on full bodied New-World and Old-World reds, to complement our steak program, as well as highly acidic white wines to complement our oysters and fresh Island seafood. In addition, certain vintages are stored in our cellar until they are ready to drink, allowing us to offer different vintages of some of our wines.

Our by the glass program features a variety of different wines, from different countries and is paired with our menu, as it changes with the seasons. We offer numerous wines, from light sipping, to big and bold full-bodied reds. Some wines are featured weekly to collaborate with daily features and to continue to showcase new products, not only to our guests, but also to our staff.

At Sims Corner Steakhouse and Oyster Bar, our philosophy is that great steaks, big wine, and PEI hospitality come together to create the ultimate dining experience.

16 / 48 / 80

[®] The Enomatic system is a worldwide certified wine preservation system. It works by reducing the presence of oxygen and replacing it with inert gas. Oxidation is considerably slowed down, and the character of the wine is maintained for a longer period.
